E-NIGMA USB Fingerprint Scanner is especially designed for users who want replace all passwords with one biometric security device. For example, it can log into your computer, shopping web pages and social network web pages. You can use E-NIGMA to encrypt and decrypt the files through the fingerprint recognition, which makes it the most easy and fast security scanner. Scanner is very fast, it only takes 0.05s to recognize your identification.

E-NIGMA is easy and convenient to use. You will only need to insert the dongle into the device's USB port, and your computer will automatically install drivers. Then all you need is to follow the steps which show on the screen. Device is supported by Windows 10 Hello, and it backward compatible with Win8.1/Win7. The advanced technique can prevent the forged fingerprint, which gives you more protection and security. Other than 360° non-directional finger access, it can also set up to 10 fingerprints, which gives your whole family a perfect and private space, and thus it upgrades your computer into a highly secure computer.
